Tools for success

ClinicSoftware.com has launched **Rejuvenation Face & Body Procedures** to allow clinics and salons to seamlessly manage treatments

Key features

- Track your daily usage
- patient management
- point and time reactions
- appointment forms
- signature on tablet or tablet for both patient and doctor
- multiple locations
- regions of focus, fat, or fillers
- compare before & after
- search ability
- multisite sync
- custom products management
- realtime software integration
- usage time
- reporting patients database
- reminders
- notes
- appointments
- inventory of services
- account balance
- reminders
- products stock
- push time
- Day Book online booking

The new software allows you to plan and monitor a wide range of procedures using clear diagrams. It is designed for use by doctors, dermatologists, nurses, facial aesthetic surgeons, spas, salons, skin specialists, and face and body specialists.

With a simple touch, you can add an injection of dermal fillers, fat, or any other procedure to a client's treatment programme. You can also view the written and lines on the face and body to record their position and progress.

The module allows you to search for a customer or a procedure, compare different procedures side by side, allocate the chosen procedure and log variables for customer forms. You can also check the client's history, add notes, take real pictures, and compare before-and-after patients. Users can change the orientation and position of the diagrams on screen to give a detailed view from any angle.

The Day Book module allows users to book appointments straight into the software. As well as individual treatments, you can book courses with real-time confirmation. Tracking the responses and treatments of each course is made easy as tracking the purchase history and accurate history of your patients. Among its many additional functions, the software also lets clinics set up online and in-app booking.

ClinicSoftware.com's professional, secure, proven, superior results. From sophisticated booking capabilities to point of sale, customer relationship management and client self-management, the software performs. It allows you to keep a close eye on stock control, product management, full reports, appointment book, marketing, SMS and email reminders anywhere and at any time. Manage gift cards, add-on treatments, client feedback consent forms to manage signature, consent forms, online bookings, and much more.

Software to grow your business

Bodycraft London grows its sales by 400% with Clinic Software. Founder and director Daniel Lyons tells us how it's helped get business booming

What are your favourite features of Clinic Software?

The business reports and finance features are great. The appointment book is very intuitive - a really nice user feature. We have vouchers, loyalty cards, gift cards and client cards, and the client card feature is another favourite. It just gives that extra touch to your beauty business. The client card came with a specific barcode on their card and once scanned the system will bring up all their history, so you can see how much credit they have on their card and you can track it in.

How has Clinic Software helped your business grow?

When we started Bodycraft London we were just getting by, really, we were just turning over. We made a big bet with our first investment in software. I just talked the business to a website booking to open other branches. One of the things that the client card feature is a reminder - but it's almost done or we're a second or a little bit away from your ideas. If you want a little or a little bit, and I want to try a Clinic Software for making us so it will just take the business to the next level.

06 OVER 10 YEARS!

REMINDER!

Ask the experts

Can automated SMS reminders help reduce no-shows in my clinic?

Definitely it is an undeniable fact that customers forget appointments. Not necessarily on purpose but the result is the same: an empty chair in your treatment room.

Let's think for a minute about how the forgetting process works. Many customers don't actually forget about appointments completely, it's just as if their brain actually forgets the appointment's date and time, but generally the appointment is forgotten in the context of when and where it is supposed to occur.

What are the reasons if you ask your customer, "Do you have an appointment coming up with us?" they'll nearly always remember that they do. They'll probably even remember the day and time. However, when that appointment time approaches, they get busy with some other activities in their brain and forget to check their calendar or their phone. When the reminder system doesn't kick in when it should (it happens to all of us), then the customer just forgets. We are all human after all.

Lead us all! The secret to reducing no-shows by 87%? The secret way to decrease the no-show rate for any type of business is by using SMS text appointment reminders. In numerous studies, appointment reminders have been shown to significantly decrease no-shows by 87% percent.

common that customers are beginning to rely on them, making SMS text appointment reminders an essential and expected business practice.

SMS text reminders are a newer form of appointment reminder as not all of the clinics and salons offer this service to their customers. SMS text reminders are quickly becoming an effective way of decreasing the no-show rate as they offer the convenience of managing appointments with smartphones. Another advantage of SMS text reminders is that they can be sent automatically after work hours, making them a handy way to get the client's attention.

By reminding your client of an appointment, you provide the opportunity for them to check in on their schedule. You will also have time to re-check, so you avoid any late hours due to missed appointments. This service is a welcoming gesture to your customers, who then are less likely to forget your appointment.

From SMS reminders, you can easily move to the next step and start creating SMS mobile marketing campaigns where the open rate is very high with a very good response rate but will discuss more about this SMS mobile marketing

The Media/Press Already Love Us

Ask the experts

Can automated SMS reminders help reduce no-shows in my clinic?

Definitely. It is an undeniable fact that customers forget appointments. Not necessarily on purpose but the result is the same: an empty chair in your treatment room.

Let's think for a minute about how the forgetting process works. Many customers don't actually forget about appointments completely. It isn't as if their brain actually forgets the appointment information, but generally the appointment is forgotten in the context of when and where it is supposed to occur.

What that means is, if you ask your customer, "Do you have an appointment coming up with us?", they'll nearly always remember that they do. They'll probably even remember the day and time. However, when that appointment time approaches, they get busy with some other activities so their brain's reminder system doesn't kick in when it should. It happens to all of us. We often remember just after the fact. We are all human after all.

I used to call it "The secret to reducing no-shows by 87%". The surest way to decrease the no-show rate for any type of business is by using SMS text appointment reminders. In numerous studies, appointment reminders have been shown to significantly decrease no-shows, by 87% percent or more. In fact, appointment reminders are becoming so

common that customers are beginning to rely on them, making SMS text appointment reminders an essential, and expected, business practice.

SMS text reminders are a newer form of appointment reminder as not all of the clinics and salons offer this service to their customers. SMS text reminders are quickly becoming an effective way of decreasing the no-show rate and their effectiveness is increasing as more people now have smartphones. Another advantage of SMS text reminders is that the messages can be sent automatically after work hours, making them more likely to grab the client's attention.

The most efficient way of reducing the number of no-shows is by sending a polite mobile text reminder to your customer. By reminding your client of the appointment, you provide an opportunity for them to reschedule in due time.

You will also have time to reschedule, so you avoid many idle hours due to missed appointments. This service is a welcoming gesture to your customers, who then are less likely to forget your appointment.

From SMS reminders, we can easily move to the next step and start creating SMS mobile marketing campaigns where the open rate is very high with a very good response but we will discuss more about this SMS mobile marketing campaigns topic in another issue. **AM**

With technological developments reshaping the market, the effectiveness of salon and spa management software now goes beyond just helping with the day-to-day running of your business. Software can help you effectively market to your client base, set realistic KPIs for your business, help you engage with your customers on even more platforms, such as social media and apps, and more.

Professional Beauty's Software channel will keep you in the know regarding the latest news and trends in software.

Alexandru Stefan
Director, [ClinicSoftware.com](#)

"The secret to perfect software is to make the complex appear user-friendly and intuitive. Software that's not understood in its entirety probably shouldn't be ordered as it will not help the business if it doesn't quite meet all the requirements. It's better to wait for a productive and complete software for your business than it is to wait for the old software to become productive. We offer the most comprehensive software on the market for clinics, salons and spas."

INTRODUCTION

You're probably reading this brochure because you want to know what ClinicSoftware.com is all about, and how this software is different from other software.

Here at ClinicSoftware.com, we understand what it means to start small and grow.

WHAT IS CLINIC SOFTWARE?

ClinicSoftware.com gives your entire company a 360-degree view of your customers, appointments and facilitates collaboration across your organization, helping you build strong, lasting customer relationships to run and grow your business.

Clinic Software stands for “Clinic, Salon & Spa Business Management Productivity.”

With ClinicSoftware.com solution, there's no magic formula. It simply manages all of your critical business information so that you can see it and manage all in one place. Implementing the right software can increase sales and productivity. You can grow sales, save time, get organized.

ClinicSoftware.com

The Industry is Changing

The Industry has changed the game for small businesses. The right technology can turn a company from a small business player in an industry to a major threat to established enterprise companies.

Organising, supporting, and enabling a small business with a software solution like ClinicSoftware.com can help that next level well and propagate the selling power previously reserved only for big companies with big teams of developers in house and a other different software with different tasks and people.

Let's take a look at the few ways ClinicSoftware.com gives small companies big business power:

- All Tools in One Place
- Grow your Business
- Reports as You Need Them
- Grow your Productivity
- Tablet Consent Forms
- Online Booking fully responsive and & Mobile

Share this Brochure!

ClinicSoftware.com

Clinic

Is it time to invest in a Clinic Software?

The contents of this brochure will help you determine that.

Signs your business needs ClinicSoftware.com

- You have no single source for information.
- You have little or no visibility.
- You have no Reports.
- You are losing data.
- You can't stay in touch on the go.
- You treat every Customer the same.
- You don't have enough time.
- You can't see the plan to grow sales.
- You have a lot of things to organise.

Does your business needs ClinicSoftware.com?

Not sure? If you check any of the above points, ClinicSoftware.com could dramatically improve your business performance, grow sales, save time and organise the things.

Share this Brochure!

ClinicSoftware.com

How Clinic Software Will Help You

We will show you couple of possibilities for how ClinicSoftware.com can help companies and appointment-based businesses of any industry and size such as clinics, spas and beauty salons.

Companies begin with a classic relationship of Business to consumer (B2C) - very simple.

If the company is young it might be fine to only maintain paper notes about your customers, sales and incoming orders, but as the number of customers grows this specific type of record/keeping can't answer to your needs to move to the next level with your business.

As you probably know and see with your business: There aren't enough hours in the day, There aren't enough days in the week. There aren't enough weeks in the month to do everything you have in plan. Honestly at the end of the day, time is money.

The more efficiently employee use their time, the great the results are to your business daily sales.

Share this Brochure!

ClinicSoftware.com

Keeping the information updated at every step

Companies size expand faster by keeping a perfect flow of new customers and investing more time booking, as well as providing with all the information they need to book the next appointments. This is where ClinicSoftware.com is necessary.

Finding time to create a flow of new customers and new appointments is a challenge for any team.

This is often caused by some of the following problems:

- Not enough information on potential and existing customers
- Not enough history about existing customers, their appointments, their purchase history and their preferences
- No reports and forecasting of future business
- No texts and email auto-reminders for their appointments
- No real-time online-booking, not available 24/7
- No marketing for monthly special offers
- No sales cycle

Bookings, Bookings, Bookings

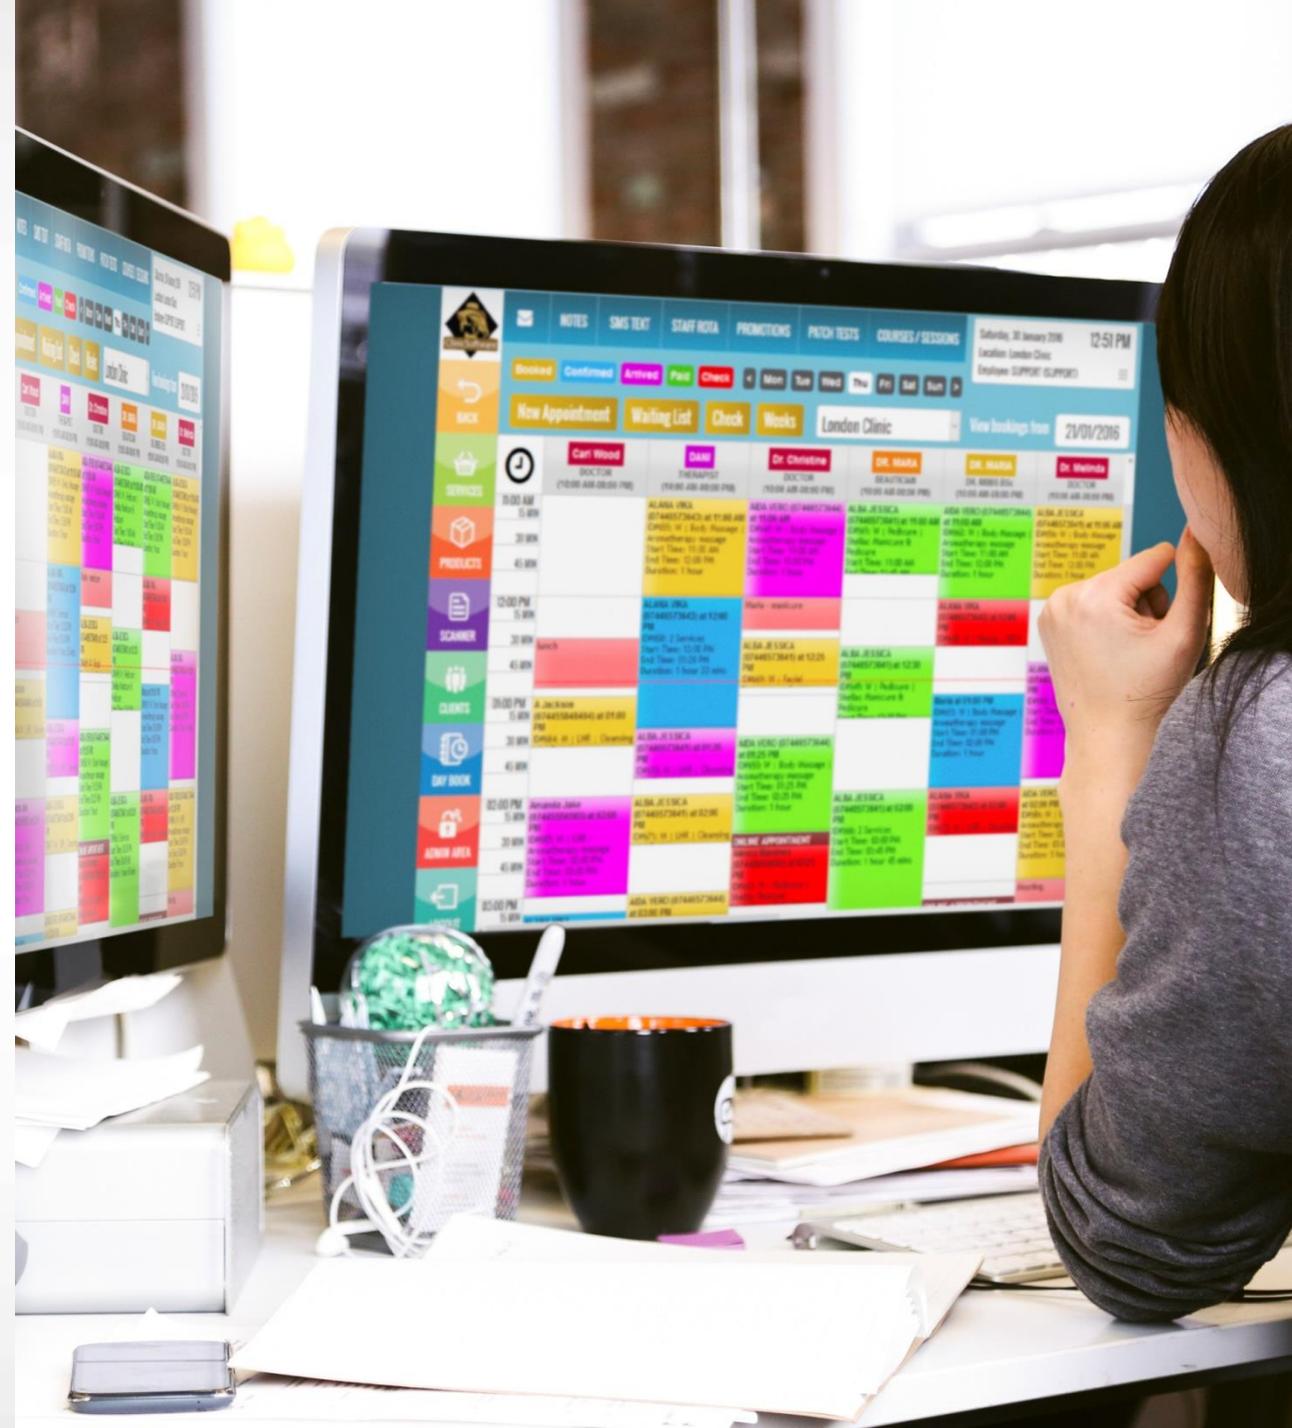

ClinicSoftware.com allows your team to book and manage appointments, payments, products, reminders, marketing and all the data about customers profile so the information's available in real time at each interaction. Plus, it quickly provides access to the reports related to appointments, sales and forecasting.

Your team need time to take bookings.

The receptionist would not be able to take more than one or maximum two phone call appointments in the same time even if another customer is waiting at the reception or other tasks to do.

Here's how you can fix this easily:

- Saving time is a big challenge for a professional team, but surprisingly using the software with a pc, tablet and smart-phone as a part of the regular work-flow can eliminate downtime and save a lot of time.
- Open your business to new appointments opportunities 24/7/365.

Bookings, Bookings, Bookings

- Automation of repetitive tasks gives your team more time to concentrate on growing up the business and take more appointments from different channels.
- With Text Marketing, you can automatically confirm bookings via SMS Text, reducing the number of no-shows and cutting back the time you spend on the phone confirming appointments.
- Automated online booking means that confirmed bookings are entered directly into the appointment book, not just a booking request.
- Providing one software solution for team to access the information and connect eliminates endless phone calls and mistakes.
- Auto Booking reminders for existing customers with less than 1 appointment in the last 30 days.- The software syncs with all the devices even with tablets and mobiles, via the in-cloud, so the entire team is on the same page and has the most current information anywhere at anytime.

How Software Improves Productivity

Keeps You In The Know

For successful business flow, you must gather vital information on existing customer and potential clients as well. But saving the data in papers or excel can be hard when you're also trying to make your bookings. ClinicSoftware.com help solve this problem by saving valuable customer data on your behalf, including:

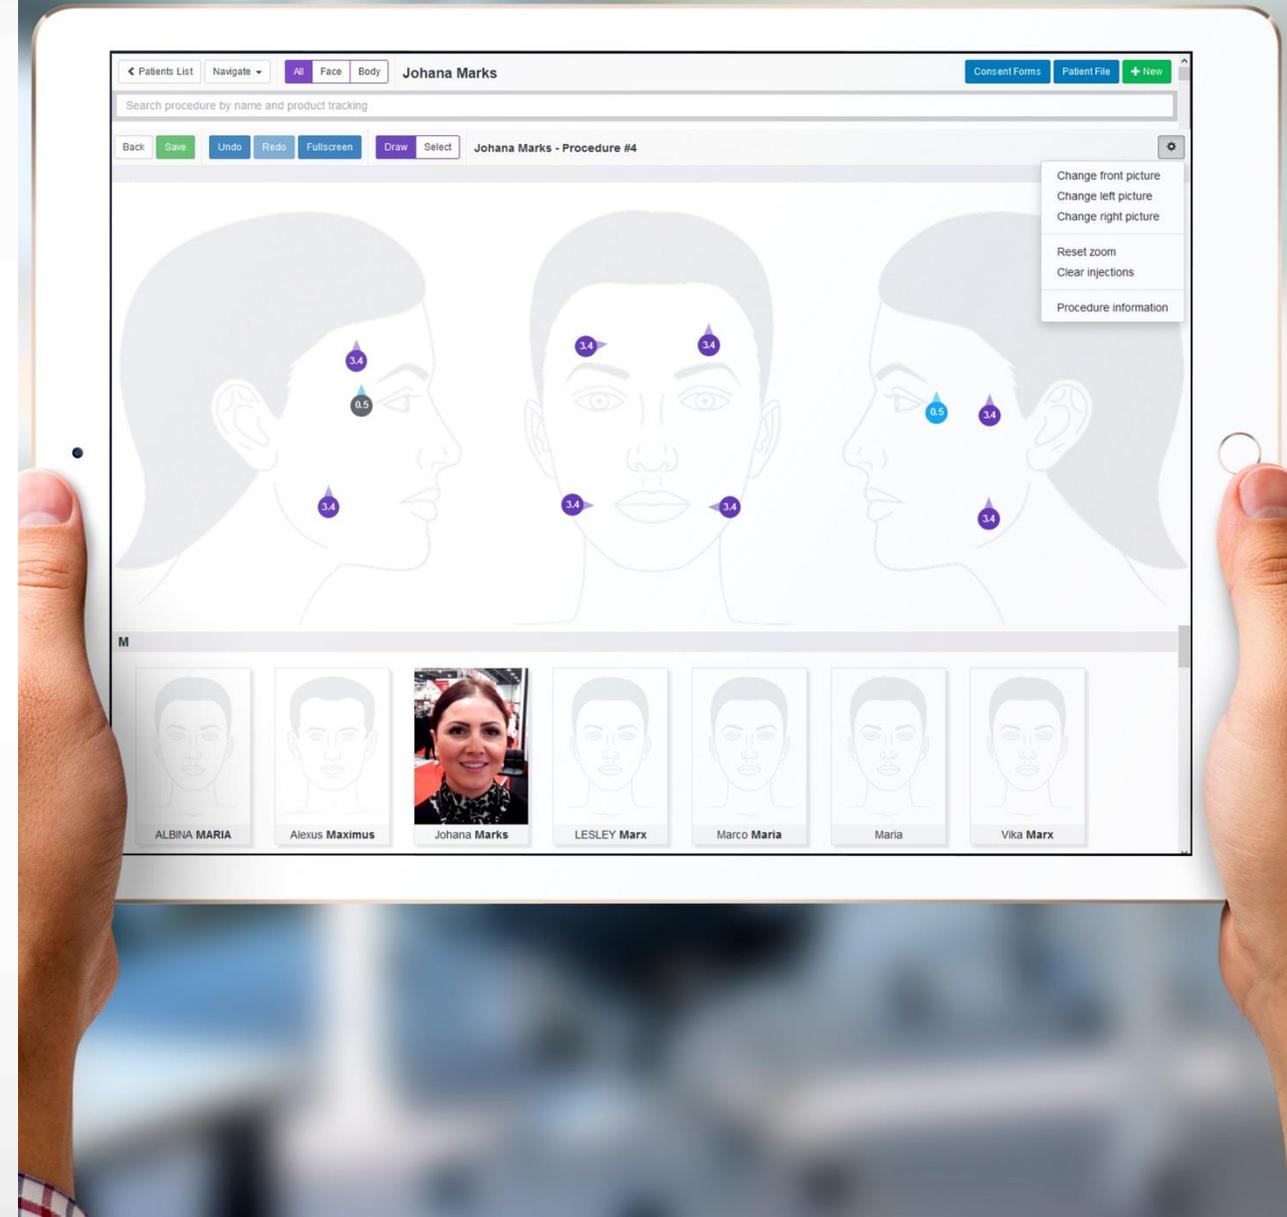

- Client history ; • Appointments history
- Current client preferences ; • Client Notes history
- Client Consent Forms history
- Client Rejuvenation Face & Body Procedures
- Past interactions with a client; • Drinks History
- Client infrastructure details ; • Receipt History
- Past sales interactions ; • Tracking Sessions history
- Tracking Minutes history; • Tracking Instalments history
- Pictures history ; • Products history
- SMS Text & email Reminders history
- Shifts history; • Reports history

These efficiencies ring true for businesses of any size.

Don't forget to think Mobile On the Go

As you consider Software solutions, it's important to consider that the modern team, they are always on, always connected, and incredibly mobile.

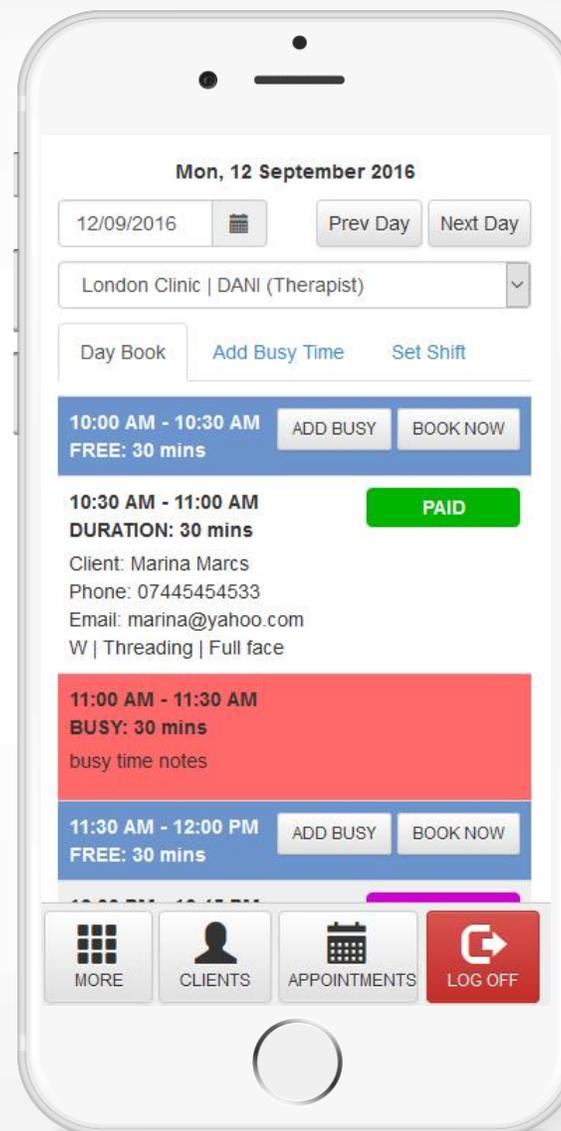

When considering any new tool, including the ClinicSoftware.com, you should make sure the technology enhances this shift in productivity, and fits into your team's existing work flow.

Mobile Software Tools

When considering Software tools, you'll notice that a rare few have functional mobile components.

Online Booking from Mobile, Day Book access from Mobile, Shifts access from Mobile.

Solutions like ClinicSoftware.com were built PC & Mobile-First with a team's Better Intelligence in mind, a true mobile Software can mean the difference between a solution that merely helps your business, and one that revolutionizes it.

A Big Help for Businesses

If you're a small business, you might be wondering if ClinicSoftware.com is right for you.

Simple: If you have customers, you can benefit from ClinicSoftware.com .

No matter how small your customer base is, it's not possible for your team to keep up with every interaction, ones that have happened, or need to happen, memorized and organized.

It's a powerful business tool that streamlines processes, gives valuable business insights, and virtually connects employees at your company so they can collaborate as a team, in real time. That's something every business could use.

But only one Clinic Software continues to help more businesses succeed than any other.

Generate More Sales

With access to more channels than ever before, businesses can dramatically increase their reach and the number of touch-points they have with a client.

Software solutions like ClinicSoftware.com allow you to adjust your auto-generation strategies across your website, promoting activities, and organic channels. Each channel inherently requires a unique approach and a Software affords you the flexibility to customize your operation for each channel while still maintaining a single organized database of Customers.

Website

The Website is now the primary business driver for nearly every industry. From organic traffic to your website, to paid promotions and banner ads, a company's reach is virtually limitless and has the ability to grow exponentially. Driving all of this traffic to the online booking on your website is a great way to start collecting new appointments on new customers and existing customers thanks to the real-time connection with the software.

Share this Brochure!

ClinicSoftware.com

Booking Activities

The fields from the booking appointment process including the appointments details are sent directly to the Software solution and used to start building a comprehensive database of legitimate opportunities for the business.

No matter what new technology comes along, professional teams will always be the heavy lifters in the Booking generation arena. With cold calls, referrals, email marketing, sms text marketing, online booking, managers can identify viable bookings opportunities and add them to their Software solution. A Software solution turns the separate activities of your team into one cohesive database that feeds your booking process.

Organic Channels

Social media sites like Twitter, Facebook, Instagram, Pinterest and LinkedIn are valuable opportunities to drive new appointments as well. As a business builds its social media audience with valuable content and engagement, it can begin to entice its followers to convert into appointments via online booking that promote treatments, offers, and content.

Optimize The Sales Flow

The Sales Flow is more than taking an appointment from a phone call from your existing customer. It is not about taking an appointment and rebook that appointment for the next visit, it is about automate the process of taking appointments and payments from all your existing but new customers.

With a well-organized appointment-generating machine, companies need to develop work-flow to manage the diverse new influx of appointments opportunities.

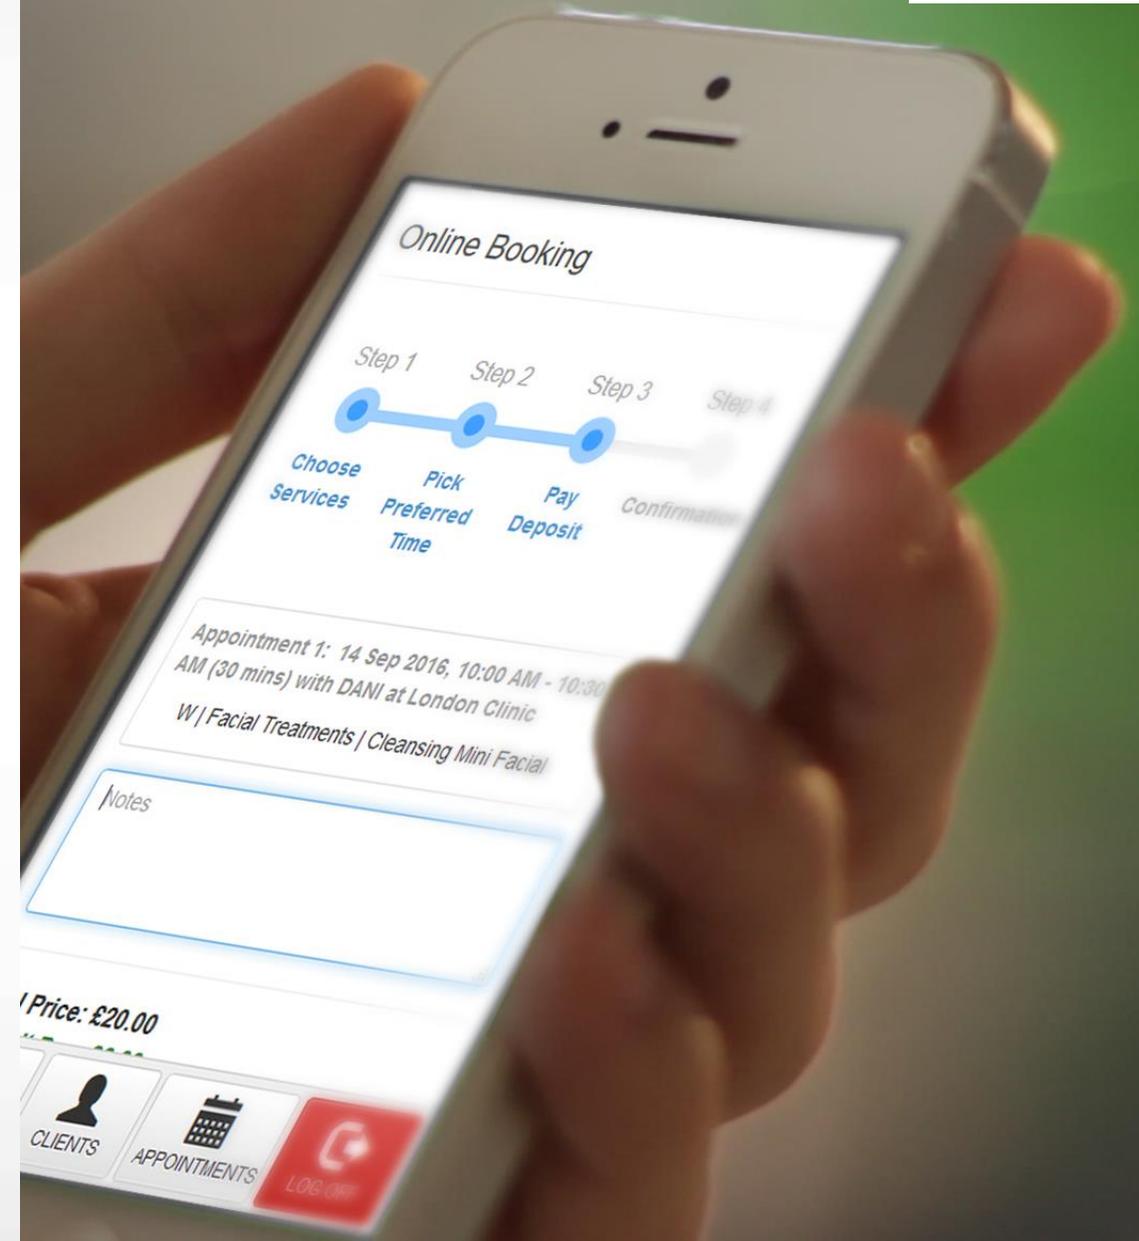

Without a software in place to manage all these appointments, a team can be thrown into chaos.

This is where a solution like ClinicSoftware.com can help. With the great marketing automation technology we offer to handle much of the organizational grunt work, and tools to keep everything neat, a business can harness its inflow of bookings to start driving business results.

Share this Brochure!

ClinicSoftware.com

Marketing Automation

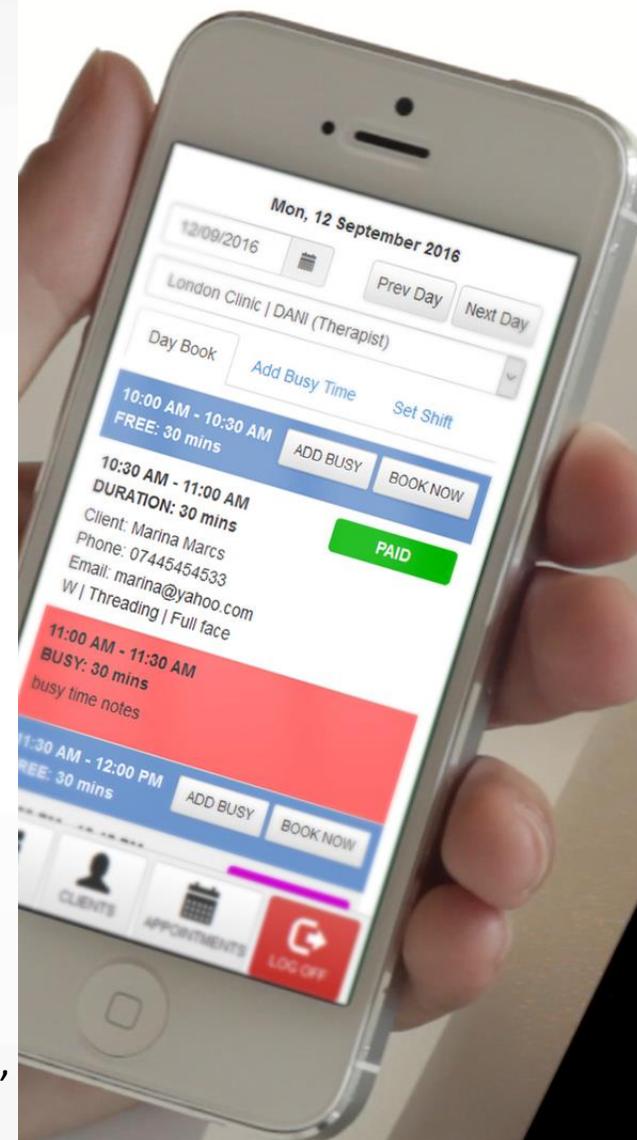

With automation tools, appointments can be automatically booked and graded by how well they fit a business ideal customer profile.

Automation of repetitive tasks gives your team more time to concentrate on growing up the business and take more appointments from different channels.

With Text Marketing, you can automatically confirm bookings via SMS Text, reducing the number of no-shows and cutting back the time you spend on the phone confirming appointments.

Automated online booking means that confirmed bookings are entered directly into the appointment book, not just a booking request.

Automated different activities from taking appointments, to payments, reminder, thank you messages, and marketing offers it could save a lot of time and you can focus on other important steps to grow your business, save time and get organized.

Grow Your Sales

Many small businesses run into the same problems at some point in their lifetime: They have great services, but they don't know how to grow their business to the next level. How do you increase bookings and win appointments? How do you grow your sales while keeping costs under control?

ClinicSoftware.com can help jump-start business growth for small businesses. ClinicSoftware.com streamlines operations, allowing you to increase sales, and decrease your costs.

In nearly every industry, there is more competition than ever before. This means it's harder than ever to win new customers.

Winning new customers comes down to who is better organized, better prepared, and better informed.

ClinicSoftware.com was designed to make taking more appointments as easy as possible.

Share this Brochure!

ClinicSoftware.com

Grow Your Bookings

Keeping track of customers on a spread sheet just doesn't count it anymore.

ClinicSoftware.com allows you to organize all of your customers, get an accurate view of your bookings, and better forecast your business.

Decrease Your Costs

Bootstrapping and staying lean allow small businesses to maintain a competitive advantage over larger businesses. ClinicSoftware.com helps keep software and personnel expenses low, improves support while shortening down times, and decreases the risk and difficulty of scaling up your business.

ClinicSoftware.com

Connect to Your Customers

Customers of today are booked online in 24 hours a day 7 days a week for 365 days a year.

Because appointments and marketing processes are transforming to meet this connected world, it's easier than ever before for small businesses to compete for customer attention.

We will explain in details ways you can use latest technology tools to put customers first and effectively grow your business, save time and get organized.

Adjust your thinking:

Embrace the "change", if you haven't already.

Then shift the focus of your business to put your customers experience front and centre.

Share this Brochure!

ClinicSoftware.com

Get social:

Most of your current and potential customers are using social media channels like Twitter, Facebook, Instagram, Pinterest, Google+, Snapchat.

Make sure your company's services are connected to this social world. A customer platform in the cloud can help you manage this by linking online appointments platform, marketing, services, and more together to directly connect to your target audience socially and profitable.

Be a good listener:

Understand where customers learn about and engage in discussions about your services and industry.

Get a system in place to monitor customer activity, history, and feedback to hear what they say, and then reflect this in your marketing offers.

"Bang Bang" the social channels: Social media sites like Facebook, Twitter, Instagram, Pinterest will let you create efficient campaigns to target your message to the right customers based on needs, age, demographics, gender, geography, and more.

Share this Brochure!

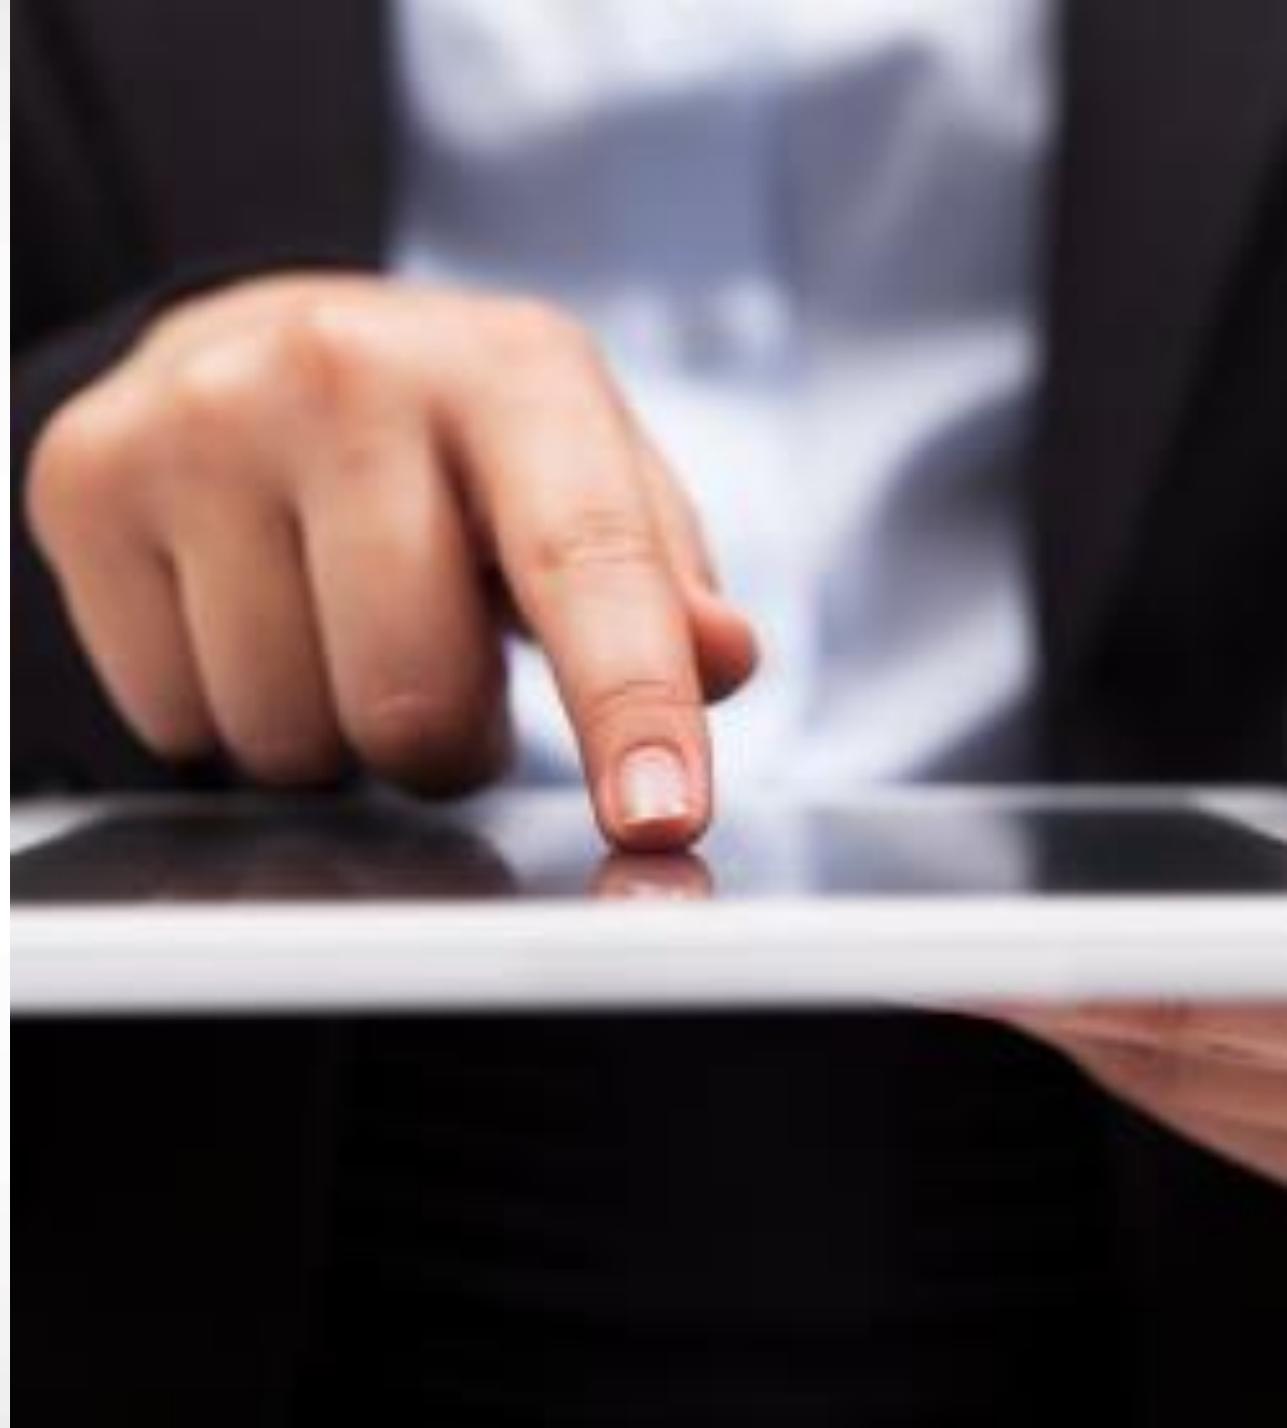

ClinicSoftware.com

Be engaging:

Create and promote content on your web site via a business blog and on social media channels, in marketing materials, that your customers and readers want to read.

Respond in real time: Today's customers participate in multiple channels and are eager to ask questions or book appointments asap if they will receive the answer asap. The sooner they get answers, the happier they are. Be responsive no matter where you are.

Be an App owner: Quickly build and deploy your own branded App that engage and impress customers. The ClinicSoftware.com solutions allows you to accomplish this faster by providing the perfect App, so you can focus on creative solutions.

Unlock important data:

Keep the critical information in your back office system — appointment status, inventory status, history, tracking of their payments and instalments, receipts — with your front office desk, services, and marketing activities, so your team is ready to serve customers and their needs at any moment and booking their next appointment in time for their favourite treatment.

Cultivate brand reactions: Existing customers are great source of information for all your potential customers. Provide these reactions with a voice on social media, newsletters, and, in turn, give customers confidence in your services and team.

Drive Your Innovation

The IT Department team and developers of our company are often responsible for building the product itself. However, as company scale and add more solutions, IT's role begins to shift.

Our IT Department is constantly focus to build new functionality or troubleshoot problems that arise. They have to constantly prioritize these incoming requests, and work very close to all our customers to build new features and reports and fit your business needs.

With ClinicSoftware.com , this day-to-day maintenance becomes a thing of the past. IT Department can finally crawl out from under the backlog of tickets and take the important role of collaborating across departments to move the company forward.

We offer you access to a lot of fully-comprehensive reports, but you have the ability to ask for any report you can imagine and we will custom build for you.

Maximizing Your ROI

Choose a Cloud-Based Business Software Solution

All major Software vendors offer cloud versions of their systems. Choosing this software as a service (SaaS) model means businesses no longer have to deal with things that on-premise software apps demand, like servers, software issues, bugs, no 24/7 access, new version upgrades and support.

Integrate with Applications that Provide Value

Take advantage of the new business and applications that are out there, and integrate them with your software licence. These include accounting, marketing, newsletter, sms marketing, payments, accounting, social media, which allow your company to track payments, instalments, customers, and capture real-time data.

Allow for Mobile Integration

Make the things accessible on mobile devices for your team so they can work on the go, things like reviewing appointments, managing bookings, and shifts.

The integration also work with back-office software, and online booking.

Simpler Direct Debit

BLOCKCHAIN

Between Sales & Marketing

Customers data is valuable when used to grow sales and to create marketing campaigns to take more appointments. But these insights can be missed if sales and marketing don't work together. Before you move forward, get both things in one place to map out common objectives, and to discuss how to use the data.

Generating Reports to analyse the business activity

The right Business Software can present data in an almost effortless pre-formatted report. Take the time to not only read the reports, but to understand and act on them when needed in order to increase sales.

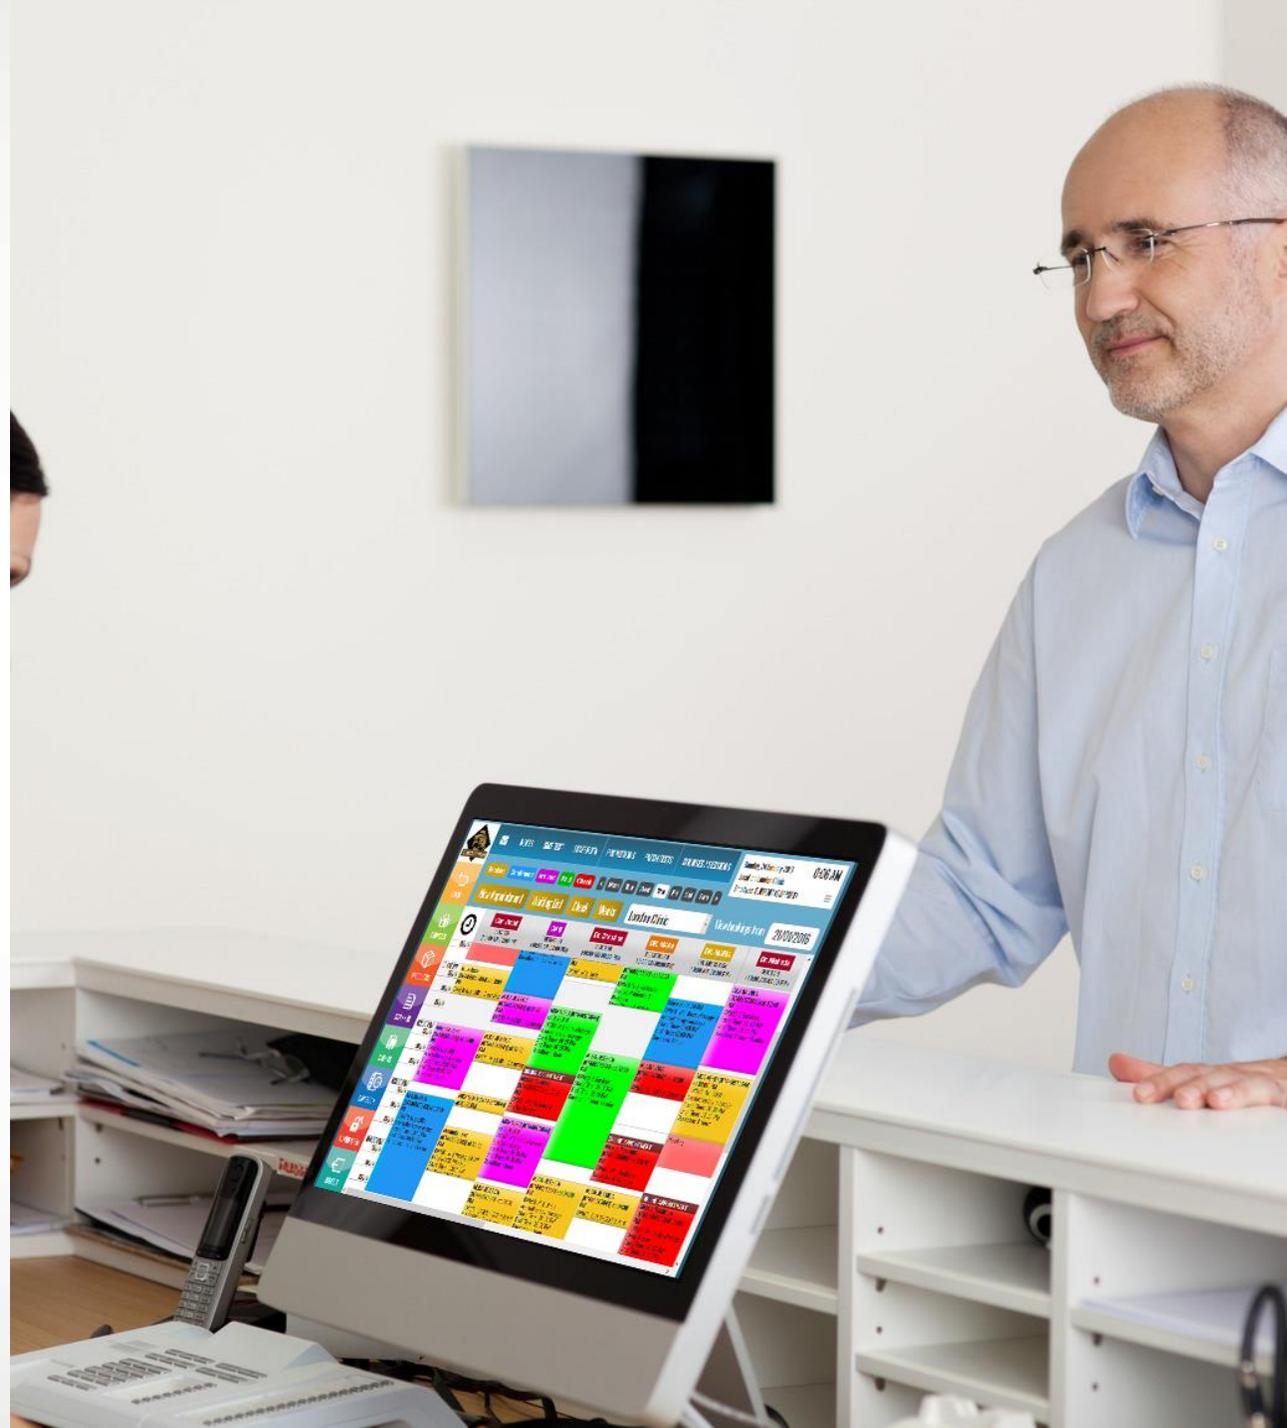

Building Loyalty Relationships with Customers

Clinic Software is an excellent tool to connect with your customers and build relationships that grow over time. Be aware that customers evolve and change, and your business may need to change with them sometimes.

How to Craft a Business Strategy

Set yourself up for success by building a comprehensive Business strategy. You need the right plan in place from a business perspective. Here are basic steps to build the perfect plan:

1. Illustrate Your Vision

Your vision can be many things, from becoming market leader for great treatments in your area, to redefining customer service within your industry. Make it both aspirational enough to have an impact, and simple enough that the entire company can understand it.

2. Decide Your Strategy

Strategy is what makes your vision the future of your business. Say you want to be area leader for beauty treatments. Do you do this by competing on price, or by offering different and great services?

3. Describe Your Business Objectives

Business objectives are where tools and strategies get translated into the every day work. A common mistake when implementing new objectives is to replicate in it all the old business strategies and processes, complete with their inefficiencies. Instead, view your new tools implementation as an opportunity to review, optimize and improve how you work.

Share this Brochure!

ClinicSoftware.com

Get Your Team On Board

4. Get Your Team On Board

Great employees are vital for your business vision, strategies and business objectives. A lack of good employees is one of the top five contributing factors to business failure.

5. Identify the Reports

You can't manage volume if you are not ready for volume of customers. Reports should be visible to everyone in order to analyse your business activities, and this means creating reports for all aspects of the company, from sales and commissions, to the staff team and performance reports.

6. Prioritize Your Actions

You're not going to get everything done at once, so decide what's most important to deliver first. Marketing is often the priority, so everyone is ready to use the new Software system in order to improve your marketing. But you have to think about other important aspects as well. Do a few things well, than a hundred things poorly. No #1 should be your customer satisfaction. Nurturing and creating happy customer advocates who share positive word-of-mouth with others. Collect the names and all the contact information from your customers. Then keep it up-to-date. History is kept automatically by the software. Describe your services in a meaningful way via social media and website blog. Keep your website updated. Segment your customers based on the latest appointments in the last 30 days so your marketing will be more focused and relevant. Keep your most profitable customers very happy with monthly special offers of your services using auto reminders and auto marketing promotions of the software. Focus on attracting new customers who are most like your most profitable customers. Get coverage from influential press and bloggers. Be great at networking online and in person. Be great at networking online and in person, and save all the notes about your customers in the software, notes sections.

Road Of Success

Detail Your Roadmap

Share this Brochure!

ClinicSoftware.com

7.Detail Your Roadmap

A successful rollout is vital, but being able to deliver enhancements and features after you go live is equally important.

Plan your campaigns and consider what other capabilities you need to deliver for the business.

Now that your software and strategy are in place, it's time to see the best ways to measure and maximize the sales.

8.Chose the right Software

Implementing the right software can increase sales and productivity.

That's why think two times and double check ten times what are you paying for if you really want to grow sales, save time, get organized.

9.Business Strategy, Repeat Success

Repeat all the above steps and repeat success, it's as simple as that.

Hi, We're ClinicSoftware.com

ClinicSoftware.com was created with the idea to re-imagine how business appointment-based management works by automating, simplifying, and deepening the way appointments engage with customers and marketing. **ClinicSoftware.com** built the world's first Appointment-based Software Intelligence technology, bringing Real-Time appointment solution and online booking platform via **24/7** in-cloud online data capture into software technology, **Real-Time** connected with tablets to sign client consent forms, face & body rejuvenation procedures, tracking courses of services, payments, customers history, products and marketing solutions. This has made it a lot easier for businesses to communicate and collaborate with their team to grow sales, save time and get organised. **ClinicSoftware.com** saw the potential of appointment-based software to power how businesses will manage their appointments & clients relationships in the future -> **more intelligently**. We continue to innovate on Booking Software technology, developing the next generation of appointment-based service & customer relationship management with powerful marketing technology, all while building products that are intuitive and easy to set up so that expanding businesses can focus on what matters -> **growing the sales fast, save time and get organised**.

Track Rejuvenation Face & Body Procedures from any tablet

The new software allows you to plan and monitor a wide range of procedures using clear diagrams. It is designed for use by doctors, dermatologists, nurses, facial plastic surgeons, spas, salons, skin specialists, and face and body specialists. With a simple touch, you can add an injection of botulinum toxin, fat, fillers or any other procedure to a client's treatment programme. You can also draw the wrinkles and lines on the face and body to record their position and progress. The module allows you to search for a customer or a procedure, compare different procedures side by side, allocate the chosen procedure and log signatures for consent forms. You can also check the client's history, add notes, take real pictures, and compare before-and-after pictures. Users can change the orientation and position of the diagrams on screen to give a detailed view from any angle. The Day Book section allows users to book appointments straight into the software. As well as individual treatments, you can book courses with real-time confirmation. Tracking the sessions and instalments of each course in real time is also easy, as is tracking the purchase history and account balance of your patients. Among its many additional functions, the software also lets clinics or salons sell and track vouchers cards.

ClinicSoftware.com's professional tools deliver proven, superior results. From sophisticated booking capabilities to point of sale, customer relationship management and unlimited staff management, the software performs. It allows you to keep a close eye on stock control, product management, full reports, appointment book, marketing, SMS and email reminders anywhere and at any time. Manage gift cards, detailed tracking information, client iPad/tablet consent forms via finger signature, live notifications, online bookings, and much more.

Reading appointments notifications right from your wrist

What can I do with a Smartwatch and should I get one?

Share this Brochure!

ClinicSoftware.com

Key Features

Reading Appointments. New Appointments, Client Notifications, Client Notes, Behaviour Stars, Appointment protocol, Drinks History, Purchase history, Latest treatments, Custom Notification and many more.

Should You Get a Smartwatch?

You want business notifications but you don't want to spend tons of time on your phone.

Smartwatches sit on your wrist and tell you what's up. You can peek to see if you just received an important business notification or if you can ignore it. Over everything else, this offers the greatest advantage because you can stay informed while out and about without rudely interrupting activities with your business. You won't look bored in meetings and you won't distract other customers. A smartwatch allows you to stay connected and informed without constantly interrupting your business.

Clinic Reports Control
